FOREWORD

This bulletin entitled "Manual of Home-Making Education," should prove instructive to those interested in that subject. It should be of special value to those in search of information bearing on vocational home economics as taught under the Federal and State vocational education acts.

This bulletin is issued as a guide to teachers of home economics in the hope that it may prove useful to them in preparing those young ladies who come under their instruction to meet their immediate problems of life, to be useful members of their families, and to acquire knowledge and skill of value to them.

A handwritten signature in cursive script, reading "John W. Abernethy". The signature is written in dark ink and is positioned above the printed name of the State Superintendent of Education.

State Superintendent of Education.

GENERAL PLAN

THIS course of study is planned for teachers of Home-Making as a guide in planning their courses. It is intended to be suggestive and not exhaustive in the problems mentioned and in subject matter, demonstrations, illustrations and related material given.

The problems may be changed to suit community and class needs but should take about the same degree of skill and show the same progress over each succeeding problem.

Aims.

The aim of the work is to teach the girl to meet her immediate problems, to live as a useful member in her family, to acquire certain information and skill which will be useful to her as a home-maker in later life.

The daily aim is: "To do common things uncommonly well." Each problem should be the simplest of its kind—the simplest undergarments—the easiest dress—potatoes cooked in the commonest way—the plainest cake—but each done to perfection of its kind. Good standards must be created, for this work is the foundation of future school work and future home-making.

Content of Course.

Foods, Clothing, The House, Child Welfare, Management of the Home.

Units.

The work is planned to be offered in units. The following order is suggested:

First Year

| | | | | |
|----------|----------|-----------|----------|---------|
| Clothing | Foods | The House | Clothing | Foods |
| 10 weeks | 10 weeks | 6 weeks | 5 weeks | 5 weeks |

Second Year

| | | | | | |
|----------|----------|---------|----------|---------------|------------|
| Foods | Clothing | House | Clothing | Child Welfare | Management |
| 12 weeks | 6 weeks | 6 weeks | 6 weeks | 3 weeks | 3 weeks |

The food lessons need not be given in the order suggested. However, it is recommended that the work begin with suppers

since the girl may go home and help with or prepare supper at once. This is the easiest meal with which a school girl can assist and it shows the parents that the school intends to help the home.

The candy and special holiday lessons may be given any time desired. Christmas problems are given in clothing work one year and in food work the other.

The meat curing lessons should consume a week at the meat killing season of the community.

The home practice work presents suggestive problems from which a girl may choose her home work. These should take the place, part of the time, of work on the class problem. The study and report problems are to be reported on in class. A topic may be given to one girl or a group of two or three to work out. The information gained may be presented orally or through charts, samples, posters, etc.

"The knowledge and skill which should be gained" is the yard stick by which the teacher measures the results of any given period of work. The year's work should result in self-improvement for every member of the class, definite help in meeting family problems and knowledge and skill which will be of value in later years.

The use of the word "project" has been purposely omitted as home work can not be adequately supervised at this time.

Related work.

The related work in the eighth grade will be general science; in the ninth grade health work for girls.

Credits.

For the home-making courses one and one-half credits will be given each year if the period is 120 minutes daily. For the related work one hour credit will be given each year.

CLOTHING

First Year—Fifteen Weeks

Aim.

Purchasing and care of clothing and personal belongings, and construction of simple garments. Developing judgment as to color and design. The relation of clothing to health should be given special attention.

Each problem should be carefully planned on paper before making. Give the girl a chance to do good work.

Any problem may be made of new or old material. Each girl should do some made over problems and some for other members of the family.

One problem only is to be selected by the girl from each list. The problem selected should always contain new learning difficulties for her or repeat those which she did not master in her previous problem.

Subject matter.

Necessary articles—box for work, box for tools, scissors, pins, needles, thimble, tape, thread. Points in selection. Suitable box. Marking articles.

Sewing out- Illustrative material, demonstrations.
fit. Complete sewing outfit properly marked.
(3 lessons.)

Related material.

Good materials for scissors, needles, pins.

Subject matter.

Selection of materials. Size of articles. Use of scissors, thimble. Straightening, measuring, cutting materials, basting. Use of machine. Name and uses of parts of machine. Straight stitching, French seams, plain hem. No fancy stitches used.

Towel, Pil-
low Case,
Sheets, Laun-
dry Bag.
(4 lessons.)

Illustrative material, demonstrations.

Samples of suitable materials with prices. Finished articles. Use of machine, scissors, thimble, needle. Basting. Steps in French seam.

Related material.

Test for linen, toweling. Time and cost record of every article made. Care of sewing machine.

Subject matter.
 Purpose of clothing. Selection of style. Selection of materials. Identification of muslin, percale. Testing, altering pattern. (Each girl make pattern for herself.) Planning, cutting. Finishes for neck. Cutting, joining, applying bias. Shaped hem.

Nightgown, Bungalow Apron, Tie Apron, Slip—two piece, plain at bottom, round neck. There is no problem in a straight top. (6 lessons.)

Illustrative material, demonstrations.
 Plain finished garments. Pictures. 4"-6" samples of materials, with price. Simple finishes. Show testing, altering and placing of pattern. Steps in making hem.

Related material.

Calculating amount, cost of materials. Buying by yard instead of fold. Materials torn if possible. Study of cotton-growth, preparation for manufacture, plain weave, bleaching, printing. Test for filling. Charts showing cotton products, by-products.

Subject matter.

Combina- tion Suit, Pet- ticoat, Bunga- low Apron, Corset Cover —Use tape in- stead of rib- bon. Omit elaborate trimmings, either hand made or pur- chased. (6 lessons.)

Styles. Materials—kind and amounts. Mak- ing corset cover pattern from combination, pet- ticoat from slip. Every girl make pattern. Se- lection and buying of inexpensive laces. Put- ting in bands. Plackets. Buttons and button- holes.

Illustrative material, demonstrations.
 Finished garments. Pictures. Materials. Sim- ple finishes. Steps in placket, making button- holes, sewing on buttons.

Related material.

Neck lines. Relation of trimmings to garment. Simple design worked out. Hygienic properties of cotton.

Subject matter.

Purchasing Underwear. Comparison of readymade and homemade

Comparison of ready-made and home-made as to cost, style, fit, material, construction. Rea- sons for buying ready-made. Knit underwear, cost, fit, wearing qualities, advantages. Stan- dard makes.

garments.
Knit under-
wear.
(1 lesson.)

Illustrative material, demonstrations.

Visit to store if possible. Borrow garments if a visit cannot be made. Mail order catalogs. Reports from girls of personal experiences.

Related material.

Ethics of buying. Textile legislation. Working conditions in mills and manufacturing establishments.

Care of
Underwear.
(3 lessons.)

Subject matter.

Mending bands, button holes, patching. Mending knit underwear. Laundering, washing, starching, ironing.

Illustrative material, demonstrations.

Mended garments. Garments properly laundered, folded.

Related material.

Hard and soft water. Softeners, soaps, soap-making. Stain removal—grass, mildew, iron, blood. Making starch. Bleaching.

Purchasing
and Care of
Shoes and
Hose.
(2 lessons.)

Subject matter.

Styles of shoes for various occasions—walking, school, etc. Proper fitting. Water proofing shoes. Overshoes. Polishes. Hose—fitting, kinds, standard makes. Making hose last longer. Washing. Mending—runs, holes, tears.

Illustrative material, demonstrations.

Visit to store if they have a good selection and good fitter. Charts—pictures. Different kinds of hose—seamless, seamed, shaped. Mended hose.

Related material.

Care of feet; cause of corns, bunions. Fallen arches. Effect of polish on leather.

Clothing
Budget. Per-
sonal ac-
counts.
(3 lessons.)

Subject matter.

Necessary clothes for school girl in this community. Cost of clothes. Inventory of clothes on hand. Value of keeping accounts. Method of keeping accounts.

Illustrative material, demonstrations.

Forms for keeping personal accounts. Work out wardrobe considering design, color.

Related material.

Designing and coloring of clothing according to art principles and costume design. Bank account. Certified check. Checks, drafts, endorsing check, money order. Receipts. Charge accounts.

Child's
Drawers, Underwaist, Gertrude, Combination—
Review and speed problems for those who have time. Make two garments alike.

(5 lessons.)

Garment with Sleeves, Boy's Waist, Child's Apron, Rompers, Night Gown.

(5 lessons.)

Subject matter.

Styles and materials for children's garments. Finishes. Interpretation of commercial pattern.

Illustrative material, demonstrations.

Pictures. Finished garments. Samples of materials.

Subject matter.

Styles and materials for children's play and school clothes. Shrinking, setting color. Setting in sleeves, yokes. Collars, cuffs, pockets. Finishes—binding, piping, stitching, folds, etc. Illustrative material, demonstrations.

Pictures. Finished garments. Finishes—binding, piping, etc.; new operations.

Related material.

Mordants in dyeing.

Subject matter.

Importance of apron. Materials. Fitting and altering pattern. (Each girl make pattern of her own.) Neck finish. Laying gathers. Joining waist and skirt. Marking garments—stitched or outlined at visible place.

Uniform Apron—Pictorial pattern No. 8976; Cap Holder, Towel—2 of each.

(10 lessons.)

Illustrative material, demonstrations.

Finished uniform.

Subject matter.

Washing—different method than before. Ironing.

Laundering Uniform.

(2 lessons.)

Illustrative material, demonstrations.

Kinds of bluing, starches. Show different way of making.

Related material.

Kinds of starches. Way of making. Bluing. Laundry equipment—boards, tubs, wringers, benches, irons, clothes lines, racks.

Subject matter.

Christmas Presents, Early in December—Girl should choose problem with new learning difficulties. (5 lessons.)

List gifts suitable for various members of family and friends. Points to consider in selecting gift—cost, use, suitability, attractiveness. Wrapping.

Illustrative material, demonstrations.

Pictures. Finished articles. Demonstration of stitches.

Related material.

Color combinations. Suitability of design to space, size of stitches. Work out simple designs. Ornamental stitches. Initials, monograms.

Subject matter.

Mending Outer Cotton Garments. (1 lesson.)

Consider value of garment in relation to time required to mend. Patching—matched patch, hemmed, overhanded patch. Tears—three cornered, straight.

Illustrative material, demonstrations.

Mended garments.

Subject matter.

Dry Cleaning, Washing Woolen Garments. (2 lessons.)

Removal of stains, spots. Washing, drying, pressing wool.

Illustrative material, demonstrations.

Pieces of wool for experimentation. Dry clean and launder actual garments.

Related material.

Effect of hot water, rubbing, soaps on wool. Use of gasoline, benzine, etc. Tests for wool.

Storage—
temporary,
between seasons. Putting
away woolen
garments.
(1 lesson.)

Subject matter.
Use of hangers, shoe trees, dress protectors.
Protection from moths, dust.
Illustrative material, demonstrations.
Moth balls, cedar oil, etc. Newspapers. Demonstrate wrapping.

School
Dress—ging-
ham, percale,
linen, cotton
poplin.
(7 lessons.)

Subject matter.
Style. Materials. Trimmings. Shrinking, setting colors. Altering patterns. Matching plaids, figures, up and down. Joining waist and skirt, placket, collars, cuffs, belt. Fitting. Comparison of ready-made and home-made dresses.
Illustrative material, demonstrations.
Pictures of suitable dresses. Samples of materials. Ways of trimming. Demonstrate laying on pattern, fitting. Ready-made dresses from store.

Related material.

Spacing, lines in stripes, plaids, arrangement of buttons. Relation of style to figure, material to style, neck line, etc. Hat, shoes, hose suitable to wear with dress.

Making
Over Dresses
—For those
who have
time.
(2 lessons.)

Subject matter.
New collars, cuffs. Lengthening skirts, combining old and new materials.
Illustrative material, demonstrations.
Pictures showing combinations of materials, fancy collars and cuffs.

Related material.

Suitable colors and materials to be combined. Costumes for various occasions. Clothing show in chapel.

Laundrying
Colored
Clothes—
Wash made
over dress or
new ones if
soiled.
(2 lessons.)

Subject matter.
Setting colors. Preventing fading during laundrying. Starching, drying, ironing.
Illustrative material, demonstrations.
Pieces of materials for experimenting. Launder actual garments.
Related material.
Effect of soap, boiling and sun on color.

Subject matter.

- Freshening Hats. (5 lessons.) Dyeing straws and trimmings. Freshening ribbons. Bindings, facings, new linings. Illustrative material, demonstrations. Dyes. Materials to demonstrate points to be taught.
- Related material.
Hats becoming to different faces.
-

Knowledge and Skill to be Gained

Selection:

Suitable styles, materials and trimmings for simple undergarments and to purchase ready-made underwear.

Good wearing, suitable shoes and how to care for them.

Suitable materials and styles for school dress.

Line and color suited to the individual.

Tests for cotton, linen, wool.

Identification with use, price, width—muslin, crepe, long-cloth, cambric, nainsook, gingham, calico, percale, sateen, pique.

Needles, thimble, scissors:

Use.

Patterns:

Take measures, understand directions, alter, cut out, using simple dress pattern.

Machine:

Thread, fill bobbin, regulate stitch, clean, oil, change needle, and do straight stitching.

Sewing processes—how and when to use:

Seams, straight, French.

Facing, cut, join, apply, true bias.

Placket, hemmed, faced.

Hem, straight, shaped.

Sleeves, set in, put on cuffs.

Collar, finish edge, put on with bias facing.

Join waist and skirt.

Fasteners—make buttonholes, sew on buttons, snaps, hooks, eyes.

Fitting garment.

Daily care of clothes:

Hangers, airing.

Mending:

Darning hose.

Plain patching.

Mending button holes.

Laundering:

White personal clothes, colored dresses.

Shrinking, setting colors.

Use of soaps.

Softening water.

Making starch.

Clothing budget:

List of clothes needed by a school girl in that community.

Cost and value of all garments made.

Personal accounts:

Keep personal accounts at least three months.

FOODS

First Year—Fifteen Weeks

Aim.

Selection and care of food. Preparation and serving of simple balanced meals. Digestion of food. The relation of food to health should have special attention.

The girls should learn first to prepare well the foods eaten in that community. Small quantities may be prepared to teach manipulative processes such as pastry making, biscuit making, etc. The process should not be considered taught until a family sized recipe is cooked by the girl. The girls should always serve and eat properly any food cooked.

Materials should be brought from home and products taken home for a regular meal as much as possible. Dishes may be prepared for the neighbors or the teachers. Food may be sold at noon. There is an added incentive for good work when the food is used by people who need the food as part of a regular meal.

SUPPERS

First Week

Subject matter.

Baked or
Stewed Fruit.
Care of labor-
atory.

Need for food. Value and ways of using fruit in diet. Cooking fresh and dried fruit. Use of stove.

Illustrative material, demonstrations.

Lighting stove or building fire. Coring apple.

Related material.

Housekeeping duties. Care of laboratory. Dish washing, preparation, method, general instructions, care of towels.

Subject matter.

Boiled pota-
toes—diced
with butter,
mashed
browned in
fat. Learn
place for
utensils.

Starch cookery. Value of potatoes in diet. Ways of serving potatoes.

Illustrative material, demonstrations.

Pictures of starch grains. Peeling, dicing potatoes.

Related material.

Digestion of starch. Distinguish between boiling and simmering. Test for starch with iodine. Change in starch when cooked.

Subject matter.

Drop biscuits. Tea—hot or cold. Study oven.

Leavening agents, flour mixtures. Manipulation. Use of oven. Value of tea. Making tea.

Illustrative material, demonstrations.

Action of soda, sour milk. Make biscuits.

Related material.

Use of soda. Composition baking powder. Oven temperature for baking biscuit. Stove: fire box, drafts, heating oven, etc.

Subject matter.

Creamed eggs. Plan supper.

Ways of cooking eggs. Effect of heat on protein. White sauce, ingredients, proportions, methods of combining, scalding milk. Planning meal. Food principles involved in balanced meal. Serving simple family meal.

Illustrative material, demonstrations.

White sauce. Plan meal. Assign all work.

Plan order of procedure. Set table.

Related material.

Effect of heat on protein. Action of egg on silver. Cleaning silver.

Subject matter.

Prepare and serve supper. Clean certain cooking utensils. Part cook meal, others clean.

Serve same foods as prepared in previous lessons. Scour knives, forks. Clean oil stove.

Illustrative material, demonstrations.

Scouring knives.

Related material.

Scouring materials. Action in scouring.

Second Week

Subject matter.

Gelatin dessert—plain, fruit added.

Proportion of gelatin to liquid. Method of preparing. Nutritive value. Variations.

Illustrative material, demonstrations.

Adding of fruit when partially congealed.

Related material.

Source of gelatin. Effect of heat and acid on gelatin.

- Fried corn and corn a la Southern. Subject matter.
 Selection of corn. Composition. Preparation.
 Value as food.
 Illustrative material, demonstrations.
 Chart showing composition of cereals.
 Related material.
 Cereals used as food. Cost. Experiments showing starch digestion.
-

- Rolled biscuit (sour milk and soda). Clean aluminum. Subject matter.
 Doughs—proportion of liquid to flour. Handling of dough. Kneaded and unkneaded biscuit.
 Illustrative material, demonstrations.
 Manipulation.
 Related material.
 Proportion of soda to sour milk. Soda and molasses. Soda and chocolate. Action of foods on aluminum.
-

- Macaroni and tomatoes. Macaroni and cheese. Fruit drink. Plan supper. Subject matter.
 Food principles and their use. Combining of foods. Cooking of macaroni. Value of tomatoes. Vitamines. Food value of cheese. Cooking of cheese. Use of fruit drinks. Danger in popular commercial soft drinks. Plan meal, using similar or same foods as those cooked this week.
 Illustrative material, demonstrations.
 Assign work. Plan order of procedure. Pictures of rats with and without vitamine diet.
 Related material.
 Buying foods. Charge accounts at store. Table of weights and measures.
-

- Prepare and serve supper. Clean part of kitchen. Subject matter.
 Wash windows. Clean cupboards. Clean aluminum.

Third Week

Subject matter.

Cornstarch pudding, plain, coconut, chocolate. Thickening agents. Ways of preventing lumping. Ingredients used. Proportions. Method of preparing.

Illustrative material, demonstrations.

Adding starch to prevent lumping.

Related material.

Source of coconut. Preparation for market. Protein digestion.

Subject matter.

Rolls. Scalloped dish. Yeast and its action. Flours for bread. Handling of bread. Baking. Comparison of rolls. Qualities of good rolls. Preparing of scalloped dishes.

Illustrative material, demonstrations.

Kneading bread, shaping of rolls.

Related material.

Growth of yeast. Use in making bread. Effect of heat and cold on yeast. Addition of sugar.

Subject matter.

Salads—potato, vegetable. Mayonnaise and oil dressing. Use of left overs. Value of salad. Ingredients used in dressing. Preparation. Preventing curdling. Emulsions. Garnishing. Amount of dressing on salad.

Illustrative material, demonstrations.

Make salad dressing. Combinations of vegetables and garnishings.

Related material.

Care of food in home. Care of cupboard, refrigerator.

Subject matter.

Rolls—parker-house clover leaf, finger. Hot chocolate. Plan supper. Ingredients in rolls. Preparation. Variations. Value of chocolate. Ingredients. Preparation. Adding salt, vanilla. Avoiding sediment, scum, in making. Milk in diet.

Illustrative material, demonstrations.

Shaping rolls. Chocolate and cocoa exhibits.

Assign work for supper.

Related material.

Source of chocolate. Experiments showing digestion of protein.

Subject matter.

Prepare and serve supper.

Four prepare meal.—Half of class prepare food previously cooked to take home or for neighbors. Individual work. Bring materials from home. Remainder clean kitchen. Consider saving steps, time, use of unnecessary dishes, getting meal done on time.

Related material.

Cost of meal. Arrangement of tools to save work.

SCHOOL LUNCHES

Fourth Week

Subject matter.

Drop cookies.

Ingredients in cakes and cookies. Methods of combining. Oven tests. Necessity for sweets.

Illustrative material, demonstrations.

Mixing and dropping.

Related material.

Study stove and oven, fuels.

Subject matter.

Cottage cheese and its combinations.

Care of milk in the home. Value of milk and cheese in diet. Effect of heat on milk. Method of making. Combinations in serving.

Illustrative material, demonstrations.

Making cottage cheese.

Related material.

Making commercial cheese.

Subject matter.

Loaf bread. Stuffed eggs.

Difference in making rolls and bread. Hard cooked eggs. Seasonings.

Illustrative material, demonstrations.

Stuffing eggs.

Related material.

Wheat—preparation of flour. Kinds. Gluten in flour. Whole wheat in diet. Causes of constipation. Laxative foods.

Subject matter.

Sandwiches—bread, biscuit. Preparation of mayonnaise.

Kinds of bread. Cutting bread. Fillings, dressings. Ingredients. Method of combining. Place in meal. Value in diet.

Illustrative material, demonstrations.

Cutting. Spreading.

Related material.

Emulsions of fats. Fat digestion.

Subject matter.

Plan, prepare and pack lunches to be eaten at noon.

Boxes for lunches. Packing.

Illustrative material, demonstrations.

Wrapping.

Fifth Week

Subject matter.

Baked custard.

Milk needed for children. Value of milk for sick and well. Ingredients. Food value of eggs. Eggs, flour, cornstarch used as thickening. Baking—temperature. Cooling oven.

Illustrative material, demonstrations.

Baking.

Related material.

Source. Preparation of starches.

Subject matter.

Nut bread. Plain loaf. Making yeast cakes.

Principles involved in making. Use of bread. Nuts, raisins as food. Nutritive value. Making dry yeast for home use. Score card for bread.

Illustrative material, demonstrations.

Score cards.

Related material.

Indigestion. Causes, results.

Subject matter.

Sandwiches.

Sandwich fillings—meats, combinations.

Related material.

Overcoming indigestion. Laxative foods, eating slowly, etc. Plan diet for person troubled with constipation.

Subject matter.

Plain cake.
Vanilla wafers. Plan lunches for two weeks.

Ingredients. Mixing. Bake in small cakes. Baking—oven tests. Variations. Illustrative material, demonstrations. Beating cake. Making wafers.

Related material.

Diseases due to indigestion.

Subject matter.

Fancy rolls for lunches. Prepare and pack lunches to be eaten at noon.

Variations of plain rolls for lunches. Illustrative material, demonstrations. Posters. Pictures fancy rolls.

Related material.

Intestinal disorders.

BREAKFASTS

Sixth Week

Toast. Coffee.

Subject matter.

Value of toast in diet. Characteristics of good toast. Variations—buttered, milk, cream, cinnamon, French. Effect of coffee on body. Characteristics of good coffee—boiled, drip, percolated.

Illustrative material, demonstrations.

Cutting bread for toast. Testing coffee for adulteration.

Related material.

Dextrinization. Coffee—Source, preparation.

Oatmeal varied with fruit. Prepared cereals.

Subject matter.

Food value of cereals. Use in diet. Comparison of cost with other foods. Cooking cereals. Variations. Prepared cereals.

Illustrative material, demonstrations.

Samples prepared cereals.

Related material.

Prepared cereals—preparation. Compare cost with uncooked cereal.

Griddle
cakes. Plan
breakfasts for
week.

Subject matter.

Flour mixtures. Making griddle cakes. Variations of recipe. Types of griddles. Frying cakes. Breakfast table service.

Illustrative material, demonstrations.

Frying cakes.

Related material.

Organizing work for a meal. Cost of food for a week for an average family. Reports from home.

Poached
eggs. Omelets.
Plan break-
fast.

Subject matter.

Temperature of water. Use of vinegar. Effect of heat on eggs. Food value of eggs. Various methods of preparing eggs for breakfast. Poaching eggs. Plain omelet.

Illustrative material, demonstrations.

Effect of different temperatures on egg whites.

Poach egg. Plain omelet.

Related material.

Income of average family. Amount spent for food.

Prepare and
serve break-
fast.

Subject matter.

Four prepare breakfast. Part of class cook foods to carry home or for neighbors. Others clean kitchen.

Seventh Week

Bacon,
grits.

Subject matter.

Food value of meats. Cooking bacon. Cooking grits. Uses of bacon fat.

Related material.

Types of foods purchased. Ways of saving money in feeding a family without lowering the food value received.

Subject matter.
 Creamed fish on toast. Value of fish. Fish available in this section.
 Seasons for fish. Selection. Cost.

Subject matter.
 Muffins (Sweet and sour milk).
 Waffles. Leavening agents. The purpose of folding in whites.
 Illustrative material, demonstrations.
 Various baking powders. Folding in egg whites.
 Frying waffles.
 Related material.
 Food needed by school girl (weight, height).

Subject matter.
 Corn meal mush. Fruit—stewed. Inexpensive, nutritious breakfast foods. Frying corn meal mush. Using left over cereals.
 Dried fruits. Economy of dried fruits. Storage of dried fruits.
 Illustrative material, demonstrations.
 Empty baking powder cans for left over cereals.
 Related material.
 Action of acids on metals (cooking utensils).

Subject matter.
 Prepare and serve breakfast. Use of left-over cereal. Part cook meal, part clean kitchen. Others cook food to be sold or taken home.

DINNERS

Eighth Week

Subject matter.
 Sweet potatoes—baking, candied. Light bread. Composition. Cooking sweet potatoes. Bread—over night process.
 Related material.
 Causes of underweight.

Subject matter.
 Finish bread. Salmon scrapple. Use of canned fish. Combinations of fish and other foods. Making scrapple.

- Saute
scrapple.
Make pastry.
- Subject matter.
Ingredients for pastry. Proportions. Character of good pastry. Combining ingredients. Baking pastry. Score card for pastry. Place of pastry in diet.
- Illustrative material, demonstrations.
Cutting in fat. Handling pastry. Baking pastry.
- Related material.
Carriers of disease—food, air, animals, people, clothing.
-

- Make pies
—cream, coconut, chocolate, lemon.
Plan dinner menu.
- Subject matter.
Review white sauce. Proportions. Flour and starch as thickening. Making meringue. Balanced meals. Consideration of day's diet instead of meal. Organization of work. Table service.
- Illustrative material, demonstrations.
Beating whites. Lay table for dinner.
- Related material.
Deficiency diseases. Cause, treatment, diet.
-

- Prepare and
serve dinner.
- Subject matter.
Setting of table for dinner. Arrangement of flowers. Home table service for dinner. Four prepare dinner. Others do work for needed practice.
-

Ninth Week

- Cabbage—
boiled, creamed, escalloped.
- Subject matter.
Succulent vegetables. Classification. Composition. Value of vitamins, minerals, cellulose. Cooking strong flavored vegetables. Method of cooking cabbage. Preventing odors of food in house.
-

- Roast pork.
- Subject matter.
Place of meat in the diet. Pork as food. Use of various cuts of pork. Ways of cooking. sauces and gravies used with pork. Uses of cold roast meat.

Illustrative material, demonstrations.

Cuts of pork. Picture of crown roast.

Related material.

Diseases caused by eating pork. Digestibility of pork.

Subject matter.

Cranberry
jelly.

Foods combined according to taste. Pork, cranberries or apple sauce; pie, cheese; cottage cheese, strawberry jam. Making jelly, jam, marmalade of cranberries. Preparation of fruit, cooking, amount of sugar.

Illustrative material, demonstrations.

Glass of cranberry jelly.

Subject matter.

Apple pie.

Making pastry. Preparing for several days—adding liquid later. Variations in amount, kind of fat. Pie with uncooked filling, two crust. Kinds of apples for pie. Seasonings.

Illustrative material.

Top crust—air holes, moistening edge, pressing together. Slicing apples for pie.

Tenth Week

Subject matter.

Stuffed and
scalloped po-
tatoes. Plan
dinners for
two weeks for
home.

Baking potatoes. Seasonings. Time saving in meal preparation. Foods prepared in morning for dinner.

Illustrative material, demonstrations.

Removing potato from jacket.

Subject matter.

Make bread.
Boil rice.

Review of bread making. Study of vitamins. Polished, unpolished rice.

Illustrative material, demonstrations.

Charts showing relative vitamine content of foods.

Related material.

Deficiency diseases.

Subject matter.

- Rice, tapioca and potato pudding. Use of left overs. Inexpensive foods.
 Illustrative material, demonstrations.
 Grating potato.
 Related material.
 Deficiency diseases.
-

Subject matter.

- Dress chicken (Use in dinner the next day). Selection of chicken. Picking, cleaning, drawing, cutting. Ways of preparing.
 Illustrative material, demonstrations.
 Dress chicken.
 Related material.
 Consider foods as to relative value in furnishing energy, tissue building, minerals, water, vitamins.
-

Subject matter.

- Prepare and serve dinner. Plates served at table by host. Four prepare dinner. Others clean kitchen, silver, etc., doing work not done before.
-

Eleventh Week

Subject matter.

- Steak, broiled, Swiss. Food value of meats. Cuts of beef for steak.
 Effect of heat on connective tissue. Cooking of tough meat as Swiss steak.
 Illustrative material, demonstrations.
 Beef chart.
 Related material.
 Garbage disposal.
-

Subject matter.

- Greens—turnips, col-lards. Corn bread. Cooking green vegetables. Value in diet. Making corn bread. Food value.
 Illustrative material, demonstrations.
 Charts showing mineral content of foods.
 Related material.
 Minerals in diet, sources, kinds in food, value.
 Absorption of food into blood.

Subject matter.

Plain cake
with fat. Plan
meals for two
weeks at
home.

Combining materials for cake. Variations.
Baking—oven tests. Foods prepared at one
meal to be used at another.

Illustrative material, demonstrations.

Type menus.

Subject matter.

Sponge
cake. Icing
for plain cake.

Difference between sponge and butter cake.
Eggs used as leavening. Combining materials.
Baking—oven tests, time. Cooked and un-
cooked icings. Tests for cooked.

Illustrative material, demonstrations.

Making sponge cake.

Related material.

Elimination of waste in body. Review entire
process of digestion.

Subject matter.

Prepare and
serve dinner.

Four prepare meal. Rest of class make cake
and cookies to carry home or sell.

The following four weeks to be given whenever
advisable:

Twelfth Week

Subject matter.

Caring for
pork in the
home. (Part to
be done by
first year
class and part
by second
year.)

Cutting. Use of different parts. Methods of
preserving. Salting. Smoking meat. Pressed
meat of head, liver, heart. Pickling feet, tongue.
Rendering lard. Making sausage, mincemeat.
Seasoning.

Illustrative material, demonstrations.

Take to a home to see cutting up of pork. Se-
cure the privilege of preparing the various
things for some one who has butchered.

Related material.

Diseases from eating pork.

DESSERTS TO CARRY HOME OR SELL

Thirteenth Week

Subject matter.

Pies—one,
two crust.
Vary amount
and kinds of
shortening.
Use of left-
over pastry.

Proportions of shortenings. Effect of varying this amount. Kinds of fat which may be used in pastry. Tarts, patty cases. Cheese straws. Illustrative material, demonstrations.
Tarts, patty cases. Kinds of shortening.

Subject matter.

Frozen des-
serts.

Ices, ice cream mixtures. Freezing—proportion of salt, ice. Packing. Ripening.
Related material.
Principles of freezing foods. Temperature of salt water.

Subject matter.

Cakes. Va-
riations of
plain cake.

Ingredients necessary. Variations. Principles governing variations in fat, liquid, sugar.
Illustrative material, demonstrations.
Baking powder.
Related material.

Kinds of baking powder. Advantages and disadvantages of different types—gas production, cost, flavor, keeping quality. Effect of changing amount of fat, eggs, sugar, liquid.

Subject matter.

Puddings—
steamed,
baked.

Icings for cakes made yesterday. Principles of making. Syrup tests. Cottage pudding. Indian meal—suet pudding. Method of making, food value. Sauces.
Related material.
Steam in cooking.

Subject matter.

Gelatin des-
serts—snow
pudding, fruit
sponge. Boiled
custard.

Source of gelatin in relation to meat. Various forms and kinds. Compare cost, time in preparation.
Illustrative material, demonstrations.
Various kinds.

Related material.

Commercial preparation of gelatin.

PRESERVATION OF FRUIT AND VEGETABLES

Fourteenth and Fifteenth Weeks

Subject matter.

Prepare
fruit for jelly
—strawberry,
dried apple.

Reasons for preserving food. Ways of preserving fruit, vegetables. Agents used in preservation. Steps necessary in preserving. Selection of fruit to be preserved. Complete sterilization. Jelly making—selection of fruit, extraction of juice. Bottling of juice for future.

Illustrative material, demonstrations.

Pictures. Canned products. Jar of perfect jelly. Jelly bag.

Related material.

Spoiling of food. Fermentation, causes, prevention.

Subject matter.

Finish jelly.

Steps in jelly making. Pectin study—solution in hot water, precipitation with alcohol. Hydrolysis on boiling with acid, occurrence. Proportions of sugar. Heating sugar. Cooking juice, straining. Canning. Sealing, sorting. Score card for jelly.

Illustrative material, demonstrations.

Commercial pectin. Score cards.

Related material.

Pectin from other sources. Making pectin.

Subject matter.

Jam or
marmalade—
canned fruit,
strawberry,
orange.

Preserving with sugar. Method—open kettle, open kettle and water bath. Marking canned goods. Score card for marmalade.

Illustrative material, demonstrations.

Jars of preserves, labels, score cards.

Related material.

Sugar—source, preparation.

Subject matter.

Can peas,
corn or beans.Difficulty in preserving some vegetables. In-
termittent process. Selection, preparation of
vegetables. Blanching, long time cookery.

Illustrative material, demonstrations.

Canned products. Jars.

Related material.

Spores. Commercial preservatives.

Subject matter.

Can toma-
atoes.Opening kettle canning of vegetables. Selec-
tion, preparation. Fancy pack. Plain pack.

Tomatoes for soup.

Illustrative material, demonstrations.

Packing.

Subject matter.

Pickles,
beet or pear.

Preserving by pickling. Vinegar, salt, spices.

Methods. Foods pickled.

Related material.

Acid as preservative.

Can fruit—Subject matter.
pears, straw-
berries.

Open kettle canning of fruit. Syrups.

Home Practice WorkCook all dishes prepared at
school.Plan, prepare and serve sim-
ple family suppers, break-
fasts, or dinners.Pack lunches for father or to
bring to school.

Canning fruits or vegetables.

Make jellies, pickle.

Make lard, sausage or pressed
meat.Bake bread, cake, pies, cook-
ies.Care of silver, glassware, chi-
na, kitchen utensils, stove.Eradicate flies or other
household pests.**Study and Report Problems**Type of stove used at home—
drafts, oven, fuel, etc.Foods purchased for home
use—preparation, transpor-
tation, use, as spices, sug-
ar, etc.

Local food supply.

Cost of food at home for a
week.Time study in meal prepara-
tion.

Variations in pattern recipes.

Chart showing prices
throughout year, eggs, but-
ter, milk, etc.

Study of rice.

Curing pork in the home.

Keeping sweet potatoes.

Knowledge and Skill to be Gained -

Food principles.

Effect of cooking and various temperatures upon protein, starch, fat, minerals, water, vitamins.

Plan balanced meals of food used in the community.

Serve simple family meals.

Prepare common dishes in family quantity.

Identify cuts of pork.

Make lard, sausage.

Make jelly.

THE HOUSE

First Year—Six Weeks

Aim.

Interesting a girl in making her room more attractive, making the best use of whatever is in the home and caring for it easily and well.

THE GIRLS' ROOM

Subject matter.

Simple types of furniture for girl's room. Amount needed. Possibilities of re-finishing. Paints, varnishes. Removing varnish or paint. Mixing paints. Applying first coat. Making designs. Finishing furniture. Window seats, boxes. Use of cretonne.

Furniture.
Refinishing
furniture. Box
furniture.
(5 lessons.)

Illustrative material, demonstrations.

Get material from advertisements in woman's magazines. Furniture catalogs. Simple furniture which can be refinished. Woods stained and varnished. Illustrations from magazines.

Related material.

Composition of paint, varnish, stains. Its effect upon wood. Good lines in furniture.

Subject matter.

Woods. Finishes for floors. Carpets. Rugs. Rugs from old rags. Dyeing old clothes for rugs. Braid or crochet rugs. Button hook to crochet rugs.

Floors, floor
covering.
(1 lesson).

Illustrative material, demonstrations.

Woods stained with floor finishes. Rag rugs. Rug catalogs.

Related material.

Effect of dye on cloth.

Subject matter.

Wall finishes. Suitable pictures. Mounting. Framing with passe-partout. Hanging pictures. Useless bric a brac. Calendars.

Wall, pic-
tures. Frame
pictures.
(1 lesson.)

Illustrative material, demonstrations.

Wall finishes. Wall papers.

Related material.

Color schemes for rooms. Kalsomine, alabastine, cutting glass. Spacing in framing and hanging pictures.

Subject matter.

Shades,
curtains,
draperies,
pillows,
scarfs, sheets,
pillow cases.
(3 lessons.)

Use, kind. Linens suitable for bedding, scarfs, etc. Sizes, designs. Each girl make one. (May be laboratory work on later days.)

Illustrative material, demonstrations.

Sample of suitable material. Finished articles.

Related material.

Suitability of design to material. Arrangement, size, spacing of design. Suiting colors to walls and other finishings.

Subject matter.

Care of
room. Daily
care.
(1 lesson.)

Arrangement of furniture. Making bed, airing, turning mattress. Care of clothes. Dusting.

Illustrative material, demonstrations.

Take to a room and do the work.

Related material.

Relation of dust and dirt to disease.

Subject matter.

Weekly
care.
(1 lesson.)

General order of cleaning. Care of toilet articles. Sweeping room, cleaning windows, woodwork, floors, mirrors.

Illustrative material, demonstrations.

Take to a room and do the work. Dusters, mops, brooms, and other cleaning supplies needed.

Related material.

Effect of cleaning agents on wood, glass, ivory, etc.

Subject matter.

Launder
sheets, pillow
cases.
(1 lesson.)

Mending bed linens. Stain removal. Launder sheets, pillow cases.

Illustrative material, demonstrations.

Mended bed linens.

Related material.

Chemistry of removing stains.

- Subject matter.
 Launder woolen blanket. Use of soap and borax. Temperature of water, handling, wringing out, drying. Muslin facing to protect quilts. Storing blankets and quilts during summer.
 Illustrative material, demonstrations.
 Facing for quilt. Moth balls, cedar oil, etc.
 Related material.
 Action of soaps, washing powder, hot water, and wringing on wool. Protection of wool against moths.
-

- Subject matter.
 Shaking curtains. Mending. Laundering. Drying.
 Illustrative material, demonstrations.
 Mended curtains.
 Related material.
 Length of curtains. Designs. Draperies and curtains.
-

GENERAL IMPROVEMENTS IN THE HOME

- Subject matter.
 Lawn, shrubs, outdoor shrubs, pruning. Outdoor flowers: repotting, separating, preparing beds, soil, planting, keeping flowers through winter. Flowers for winter blooming: boxes, baskets, choosing soil, care in house. Arranging flowers in vases.
 Illustrative material, demonstrations.
 Pictures of yards. Seed catalogs. Pots, baskets, boxes, painted cans, gourds. Soil samples. Knives for pruning. Vases. Flowers to be arranged.
 Related material.
 Soil needed for plants. Fertilizers.
-

- Subject matter.
 Selection of table linens. Muslin, oil cloth, etc., for luncheon sets. Making luncheon set or lunch cloth. (May be laboratory work on later days.)

Illustrative material, demonstrations.

Pictures. Sample materials. Finished articles.

Related material.

Artistic setting of table.

Subject matter.

Care of table linen. (2 lessons.) Mending table linen. Stain removals. Laundering linens.

Illustrative material, demonstrations.

Mended linens.

Related material.

Chemistry of stain removal.

Subject matter.

A convenient kitchen. Rearrangement. Labor saving devices. (2 lessons.) Arrangement of furniture to save steps. Motion studies. Time studies. Value of schedule. Work table on castors. Stool. Iceless refrigerator. Fireless cooker.

Illustrative material, demonstrations.

Drawings of kitchens showing arrangement of furniture.

Related material.

Principle of fireless cooker. Iceless refrigerator. Cleaning agents.

SANITATION IN THE HOME

Subject matter.

Yard, out houses. Clean-up day at school. (2 lessons.) Drainage of yard. Water holes—cause of mosquitoes. Tin cans, rubbish, care of toilets. Lime, ashes, other disinfectants. Deodorants.

Illustrative material, demonstrations.

Posters. Pictures. Score card for yard.

Related material.

Relation of filth to disease.

Subject matter.

Cleanliness in house. (1 lesson.) Kinds of sinks, bathroom, refrigerator. Advantages, disadvantages, care. Garbage disposal. Kinds and care of garbage cans. Feeding hogs and chickens.

Illustrative material, demonstrations.

Cleaning agents. Types of garbage cans. Score card for home.

Related material.

Relation of cleanliness to spoiling of food, disease. Cost of unsanitary conditions in the home.

Subject matter.

Household
pests.
(1 lesson.)

Flies, mice, roaches, moths, ants, bedbugs. Habits. Breeding places. Method of destroying. Preventative measures.

Illustrative material.

Insecticides, fly, mouse, rat traps.

Related material.

Poisons. Antidotes for poisons.

Subject matter.

Milk sup-
ply. Water
supply.
(1 lesson.)

Health of cows, men handling cows or milk. Sanitation in barns. Care of milk in dairy. Delivery of milk. Care of milk in home. Water—uses, sources, character of wells, cisterns. Location of wells. Sources and danger of contamination.

Illustrative material, demonstrations.

Milk bottles, pictures, etc. Drawings showing seepage into wells.

Related material.

Relation of milk and water supply to health. Typhoid fever, tuberculosis. State laws governing health. Work of State Board of Health.

Subject matter.

Groceries,
meat markets.
(1 lesson.)

Protection of food in stores. Boxes, glass cases. Handling. Flies, bugs, dust.

Illustrative material, demonstrations.

Score cards for judging stores supplying food.

Related material.

Disease carriers. Preservatives used in foods.

Home Practice Work

Window box.
 Flower centerpiece on dining table or in living room for two weeks.
 Plant some spring yard flowers.
 Pot flowers for house.
 Care for yard for two weeks.
 Refinish a piece of furniture.
 Frame picture.
 Make window seat.
 Make some kitchen labor saving devices.
 Fix curtains for a room.
 Help launder quilts, comforts or blanket.
 Launder table linen, removing stains.
 Care of stove for two weeks.
 Wash windows of room.

Study and Report Problems

Choose furniture suitable for bedroom.
 Find out cost of various furnishings.
 Varnish, paints, etc., cost, care, combinations.
 Floor coverings, kinds, cost, wearing qualities.
 Comparative merits of cleaning agents.
 Study of home stove, drafts, oven, flues.

Knowledge and Skill to be Gained

Select suitable furniture for girls' room.
 Appreciate good pictures.
 Arrange flowers attractively.
 Launder table and bed linens.
 Care for bed and bedding.
 Care for kitchen, stove, cooking utensils, pantry and refrigerator.
 Arrange kitchen furniture and equipment to save steps.

CLOTHING

Second Year—Twelve Weeks

Aim.

Purchasing and care of clothing and personal belongings and construction of clothing. Handling woolen and thin cotton materials. This course is based on the knowledge and skill gained in the first year.

Subject matter.

Undergarment for review. Clothing budget.

(5 lessons.)

Fancy stitches. Rolling and whipping. Use of attachments—tucks, hemmer, etc. Laces, embroideries for underwear. Fancy stitches. Make clothing inventory. Revise budget.

Illustrative material, demonstrations.

Pictures of finished undergarments. Finished garments. Ornamental stitches. Other finishes. Fine material for underwear.

Related material.

Care of sewing machine. Work out simple, decorative stitches. Spacing for tucks. Width of ruffles, hems.

Subject matter.

Pajamas, night shirt, middy.

(8 lessons.)

Selection of materials. Put in yokes. Middy collar. Bound pocket. Emblems.

Illustrative material, demonstrations.

Sample of materials. Finished garment. Steps in bound pocket. Applied yoke.

Related material.

Cotton tests. Sizing.

Subject matter.

Made over woolen garment—middy skirt, middy, simple dress or child's garment.

(10 lessons.)

Planning garment. Ripping, mending, washing, pressing woolen materials. Cutting garment. Finishing woolen seams. Placket. Pressing. Hemming by hand. Finishes: bound button holes, arrow points, braiding, piping, binding, embroidering.

Illustrative material, demonstrations.

Pictures. Wash, dry, press, pieces of woolen materials. Textile tests. Steps in finishes.

Related material.

Value of wool for garments. Woolen tests.
Effect of chemicals on wool. Removing spots.
Woolen industry. Adulterations. Dyeing wool.

Subject matter.

Buying readymade clothes for winter. Wool and silk garments, hats, gloves, hose, shoes. (2 lessons.) Points to consider in any garment—cost, use, other clothing, durability. Hats—shape of face, coloring. Care of clothes. Importance of overshoes.

Illustrative material, demonstrations.

Visit to store. Borrow garments from store.

Related material.

Tests for silk.

Subject matter.

Renovating hats. (1 lesson.) Cleaning ribbons. Steaming velvets. Dyeing—rit. Cutting brims. New facings, linings. Care of hats.

Illustrative material, demonstrations.

Last year's hats. Applying new facings, linings. Making bows.

Related material.

Color and material combinations.

Subject matter.

Dry cleaning. (2 lessons.) Home dry cleaning. Removing stains. Use of gasoline, benzine, chloroform, ether, etc. Pressing.

Illustrative material, demonstrations.

Cleaning agents.

Related material.

Action of cleaning agents.

Subject matter.

Family laundry. (3 lessons.) Preparation for washing—water, soaps, blues, starches, mending, stain removal. Sorting clothes. Order and method of work. Washing, rinsing, starching, drying, ironing. Putting away clothes.

Related material.

Effects of different soaps on various textiles.
Removing bluing. Laundry equipment—machines.

Subject matter.

Tailored
cotton or lin-
en dress.
(8 lessons.)

Selection style, material. Seams, flat fell, pressing. Finishes, braids, bindings, buttons, bound button holes.

Illustrative material, demonstrations.

Pictures, patterns. Materials. Finishes. Buttons. Steps in bound button holes, other finishes.

Related material.

Tests for linen. Harmony in line style and color to different figures.

Subject matter.

Made over
spring dress.
(3 lessons.)

Possibilities in freshening old garments. Combining materials. Any individual problems.

Illustrative material, demonstrations.

Dresses of two materials.

Subject matter.

Satin petti-
coat or slip.
(Speed prob-
lem for more
rapid work-
ers.)

Review operations. Scallop at bottom.

Related material.

Mercerizing cotton. Vegetable silk.

Subject matter.

Thin sum-
mer dress.
(Voile, organ-
die, lawn, tis-
sue ging-
ham).
(9 lessons.)

Selection—style, material. Permanent organdie. Working on sheer material. Organdie flowers, other self trimmings.

Illustrative material, demonstrations.

Catalogs. Visit to store. Samples. Self trimmings.

Related material.

Color tests.

Subject matter.

Hats of
washable ma-
terial.
(10 lessons.)

Suitability of shape, material. Selection of shape, material. Cutting. Making and applying parts of hat, finishes, lining.

Illustrative material, demonstrations.

Visit to store to select shape.

Home Practice Work

Use of attachments on home machine.
 Make undergarments for other members of family.
 Make middie, dress for another member of family.
 Make over dress.
 Assist with family mending.
 Care for shoes.

Study and Report Problems

New ornamental stitches.
 Garments using tailored finishes.
 Test wool, linen, silk, cotton materials for color, durability, adulterations.
 Standard brands hose.
 Structure of foot, proper shoes.
 Materials for winter coats.
 Plan spring clothes.

Knowledge and Skill to be Gained**Selection:**

Choose suitable clothing for all occasions.
 Get value for money spent.
 Tests for silk.

Identification with use, price and width of serge, broadcloth, damask linen, linen, crepe de chine, pongee, taffeta.

Machine:

Use attachments.

Construction:

Make middie, tailored cotton dress.
 Handle wool, sheer cotton materials.
 Mending wool.

Laundering:

Do family washing.

FOODS

Second Year—Twelve Weeks

Aim.

Selection and care of food. Preparation and serving of simple balanced meals, diet for various members of family. This course is based on knowledge and skill gained in the first year.

First and Second Weeks

Subject matter.

Selection, preparation, packing, processing.

Sterilization of jars for open kettle process.

Canning
beans, pimen-
toes, pears.

Canning fruit.

Illustrative material, demonstrations.

Pictures of canned vegetables. Canned fruits, jellies, etc. Score cards. Bottles, jars, sealing materials.

Related material.

Bacteria, spores. Molds. Fermentation.

Subject matter.

Study pectin—extraction of juice, use of jelly

bag, paraffin. Test for good jelly. Preparation

of sugar.

Preserves
—pear, apple.
Jelly—apple.

Subject matter.

Preparation, canning, sealing.

Catsup.

Subject matter.

Preservation by pickling. Preserving agents.

Selection fruit, vegetables. Preparation of vin-

egar, spices. Overnight process.

Pickles.
Pepper relish.
Pear pickle.
Chow-chow.

Related material.

Food adulterations. Commercial preservatives.

SUPPERS

Third Week

Subject matter.

Classification of vegetables. Methods of cook-

ing. Composition, importance of vegetables in

diet.

Green vege-
tables, string
beans.

Illustrative material, demonstrations.

Charts showing composition of vegetables.

Related material.

Use of minerals in body.

Subject matter.

Fresh fish.
Salmon loaf.

Fish—fresh, canned. Value of fish. Meat substitutes. Composition. Price. Use of left overs. Sauces.

Related material.

Review digestion.

Subject matter.

Bread
sticks.

Composition of corn meal. Food value. Variations in muffins. Recipes. Baking. Plan supper. Review table service.

Related material.

Review assimilation of food. Elimination of waste.

Subject matter.

Gelatin—
fancy.

Source, forms, brands. Protein spacers. Various combinations. Types of desserts—Spanish cream, Bavarian cream.

Illustrative material, demonstrations.

Fancy molds. Booklets, pictures.

Related material.

Gelatin in meats.

Subject matter.

Prepare and
serve supper.

Four prepare meal. Use no waitress. Some prepare dessert to use at home or sell, others do cleaning not done before.

Fourth Week

Subject matter.

Stuffed po-
tatoes.

Methods of cooking. Ways of serving. Seasonings. Food combinations. Plan suppers for two weeks.

Illustrative material, demonstrations.

Charts showing composition of starch. Starch grains, raw, cooked.

Meat cro-
quettes.
Creamed
meats.

Subject matter.
Using left over meats. Seasoning. Creamed
dried beef, meat croquettes. Fats used in deep
fat frying. Preventing soaking of fat. Tem-
perature of fat. Frying.
Related material.
Effect of heat on fat.

Rolls.
Doughnuts,
fried cakes.

Subject matter.
Making rolls. Variations for doughnuts. Fried
cakes. Difference between doughnuts, fried
cakes.
Illustrative material, demonstrations.
Handling, frying, draining fat, storing cakes.
Related material.
Causes of rancidity in fat.

Fruit salad.

Subject matter.
Cooked and mayonnaise dressing. Use of flour
in place of part of eggs. Using whole egg in
salad dressings. Combinations of fruits for
salads.

Prepare and
serve supper.

Subject matter.
Setting table. Home table service. Prepara-
tion of foods in the morning for the night meal.

DINNERS

Fifth Week

Beef roast.

Subject matter.
Cuts of beef. Method of cooking different cuts.
Roasting meat. Food needed for different oc-
cupations. Use of left over meats. Care of
meat in home.
Illustrative material, demonstrations.
Cuts of beef. Visit to market.

Soups with-
out stock.
Croutons.

Subject matter.
Cream of tomato soup. Combining milk, toma-
toes, vegetable soup with water. Vitamines in
milk, tomatoes. Value of vitamines. Effect of

heat on vitamins. Physical condition determining diet. Making croutons.

Illustrative material.

Pictures of rats fed on different diets.

Related material.

Buying canned soups.

Subject matter.

Dried
beans, peas.

Food value of dried vegetables. Method of cooking—soaking, changing water in cooking, soda. Bean or pea soup. Boiled beans or peas with pork.

Subject matter.

Custard.
Sweet potato
or pumpkin
pie.

Bake beans boiled the day before. Review making pastry. Making and baking custard. Preparing sweet potatoes for pie. Seasoning. Plan dinner.

Related material.

Digestibility of pastry.

Subject matter.

Prepare and
serve dinner.

Serving dinner at table. Family service without waitress.

Sixth Week

Subject matter.

Strong flavored
vegetables,
carrots,
turnips, rutabagas,
onions.

Parboiling. Boiled—with cream sauce, with butter. Stuffed onions. Plan dinner for company to be served in courses. Table service, waitress's duties.

Subject matter.

Irish potato,
escaloped,
salad.

Escaloped dishes. Seasonings—baking. Marinating. Combinations with potatoes. Hard cooking eggs. Garnishes.

Subject matter.

Short cake
—peach, berry.
Steamed
pudding.

Short cakes: variations. Cake—biscuit dough. Preparation of fruit. Cup puddings—fruit and batter, steamed.

Hen for roasting. Launder table linen—clean silver.

Subject matter.
 Picking, singeing, drawing, salting. Preparation of stuffing. Roux for roasting. Temperature of oven. Time of cooking.

Illustrative material.
 Drawing chicken for roasting.

Prepare and serve dinner in courses.

Subject matter.
 Serving dinner in courses using waitress. Carving roast chicken.

Seventh Week

Soup with stock. English peas.

Subject matter.
 Make stock. Use of canned vegetables with butter, sauce.

Meat with potatoes, rice.

Subject matter.
 Finish soup with stock. Left over meat. Shepherd pie. Rice timbales with meat centers and gravy—steamed.

Cream puffs. Hot water pastry.

Subject matter.
 Making pastry. Baking. Cream for centers, variations.

Illustrative material, demonstrations.
 Make puffs.

Fruit salads. Frozen desserts.

Subject matter.
 Combinations. Variations of dressings. Plain and custard foundation for frozen desserts. Variations. Ices, sherbets, creams.

Prepare and serve dinner.

Subject matter.
 Make a time and route schedule to use in preparing meal. Check on it as meal progresses.

LUNCHES

Eighth Week

Bread. Subject matter.
Flours. Making bread. Loaf bread—rusks,
cinnamon rolls. Clean stoves.
Related material.
Fermentation. Growth of yeast.

Sand-
wiches. Subject matter.
Use. Essentials of good sandwiches. Food
suited to age, weight. Mixing of filling. Pre-
paration of bread. Wrapping. Use of crusts if
cut off.

Sponge
cake. Cookies. Subject matter.
Difference between butter and sponge cakes.
Manipulation, baking. Variations in cake reci-
pes for cookies. Addition of fruit, flavors, nuts,
etc. Unfrosted cakes, cookies for children.

Foods from
milk for
lunches, cus-
tard, cottage
cheese, cocoa. Subject matter.
Value of milk. Making baked custard. Making
cottage cheese. Combinations of cheese with
nuts, dates, raisins in sandwiches. Making co-
coa. Use of thermos bottle.

Pack lunch
boxes. Have
picnic. Subject matter.
Kind of lunch box. Accessories—napkins,
dishes, utensils, etc. Food planned according
to season—distance to be carried.
Illustrative material, demonstrations.
Lunch boxes, oil paper, napkins.

CHRISTMAS GOODIES

Ninth Week

Subject matter.
Fruit cake. Ingredients. Making. Baking. Frosting. Storing.
Illustrative material, demonstrations.
Preparation of ingredients. Mixing. Pans for
baking.

Related material.

Oven temperature controlled by ingredients in product, size, shape.

Fancy cakes. Fruit cookies.

Subject matter.

Variations in shapes. Fancy icings.

Illustrative material.

Cakes, pictures. Icing.

Related material.

Colorings used in foods.

Candy—Fudges, taffy, fondant, mints.

Subject matter.

Sugar. Time of cooking. Tests for various kinds. Handling. Coloring, nuts, flavoring, fruits. Dipping fondant. Variations in use.

Related material.

Change in sugar by heating. Dry heat—caramelization. Liquid and heat—fondant.

Party refreshments.

Subject matter.

Where, how, what to serve. Cost. Decorations.

Illustrative material, demonstrations.

Favors, decorations, pictures.

Related material.

Making favors, decorations. Color schemes.

Tenth Week

Meat curing.

Lessons in meat curing which were not taught in first year.

Nutrition. Feeding the family. (2 weeks.)

Subject matter.

Plan meals. Criticise and reconstruct home meals. Needs of various members of family—age, occupations. Plan individual meals. Work out 100 calorie portions. Diet in abnormal conditions.

Talk by doctor, nurse.

Home Practice Work

Canning, drying, preserving,
pickling, jelly-making.
Storing family supply of eggs
in water glass.
Plan, prepare, serve any meal.
Do family marketing for
week.
Prepare school lunch.
Care of milk and butter.
Make refreshments for party.
Care of kitchen at week ends.
Care of linens, silver.
Try new methods of cooking.

Study and Report Problems

Home range.
Leavening agents.
Comparative cost of staple
products.
Plan meals for week.
Keep account for family.

Knowledge and Skill to be Gained

Select food and plan balanced meals for family.
Preparation of all ordinary dishes used in family.
Follow directions and judge recipes as to proper proportions.
Make good preserves, can vegetables properly.
Preserve eggs and care for meat in home.
Care for kitchen, food and utensils in sanitary manner.
Know high standard required for finished product.

THE HOUSE

Second Year—Six Weeks

Aim.

Making the home attractive and convenient and caring for it properly.

MAKING IMPROVEMENTS IN THE HOME

Subject matter.

Planning
improve-
ments.
(1 lesson.)

Amount of money to be spent. Work done by family or hired. Sources of information in regard to work desired. Each pupil draw plan of house with which she is familiar. Outline brief description of it—floor and wall finishes, outside appearance, etc.

Illustrative material, demonstrations.

Floor plans of homes similar to those in neighborhood.

Subject matter.

Running
water, heater,
sink, bath-
room, drain-
age. Sewage
disposal.
(1 lesson.)

Source of water. Means of getting water into house. Original cost. Cost of upkeep. Kinds of heaters, sinks, tubs. Good and bad points in each.

Illustrative material, demonstrations.

Bulletins, pictures. Catalogs from houses installing such equipment.

Related material.

Principle of pressure tanks. Sewage disposal: farm home methods, city system, final disposal.

Subject matter.

Electricity
for lights,
equipment.
(1 lesson.)

Electricity: source of power. Original cost. Cost of upkeep. Lighting. Equipment: iron, toaster, washing machine, churn.

Illustrative material, demonstrations.

Bulletins, pictures. Catalogs from manufacturers of lighting plants and others.

Related material.

Study of electricity.

Subject matter.

Cupboards, closets, shelves, etc. (1 lesson.) Need for storage space. Space to be used. Closets: shelves, rods, drawers at bottom, double doors. Cupboards, height, depth of shelves, distance apart. Shelves: use. Window seats, storage chests, etc.

Illustrative material, demonstrations.

Pictures from magazines. Drawings.

Subject matter.

Additional space: rooms, porches. New floors. (1 lesson.) Need for more room. Relation to rest of house, convenience, outside appearance. Size, lighting of room. Floors, kinds of wood, cost.

Illustrative material, demonstrations.

Drawings. House plans.

Related material.

Woods used in different parts of house.

Subject matter.

Furniture. (3 lessons.) Money to be spent. Usage: amount, kind. Length of service desired. Rest of furniture. Styles of furniture. Points in construction. Wood—finishes. Upholstery.

Illustrative material, demonstrations.

Furniture. Catalogs. Articles, pictures from magazines. Visit store.

Related material.

Good and bad taste in furniture.

Subject matter.

Furnishings. (2 lessons.) Money to be spent. Other furnishings, furniture. Furnishings: usage, amount, kind, length of service desired. Materials suitable for curtains, draperies, pillows, scarfs, rugs, carpets, linen, bedding.

Illustrative material, demonstrations.

Samples of materials. Magazine articles. Finished pieces. Visit store.

Related material.

Good and bad taste in furnishings.

Subject matter.

Pictures.
(1 lesson.)

Kinds of pictures for different rooms. Sizes of pictures for space. Frames, mats. Hanging, wires, grouping. Study few good pictures.

Illustrative material, demonstrations.

Small pictures. Books from Perry, Brown, etc. Pictures from magazines.

Related material.

Appreciation of pictures for home.

Subject matter.

Purchasing of stoves, washing machines, refrigerators, cooking utensils, dishes, brooms, mops, brushes, etc. Points: money to be spent; usage, amount, kind; length of service desired. Materials from which made. Cost of upkeep in time, energy, money.

Illustrative material, demonstrations.

Visit stores. Catalogs. Magazine articles.

Related material.

Metals: cost, wearing qualities, upkeep.

Subject matter.

Paints,
stains, var-
nishes, wall
paper.
(1 lesson.)

Woods, kinds, cost, good points. Finishes, kinds, costs, good points, applying, care. Wall papers, kind, cost, hanging, care.

Illustrative material, demonstrations.

Samples from paint companies. Wall paper books.

Related material.

Paints, stains, varnishes. Preservation of wood, mixing. Colors.

Subject matter.

Color
scheme for
house.
(1 lesson.)

Room as a whole. Relation to other rooms. Harmony. Balance. Restfulness. Combination of colors.

Illustrative material, demonstrations.

Alabastine Co. Samples.

PLAN IMPROVEMENTS IN HOUSE KNOWN TO PUPIL

Subject matter.

Living room, halls, dining room, bedrooms, porches, kitchen.

(5 lessons.)

Needed improvements. Improvement to be done by family, outside help. Cost. Furniture, furnishings already there. Plan those to be added each year.

Illustrative material, demonstrations.

Pictures. Visit to remodeled house.

IMPROVEMENTS OUTSIDE HOME

Subject matter.

Yard—flowers, shrubs.
(1 lesson.)

Laying out of grounds. Drainage. Location of trees, shrubs, hedges, grass. Flowers for every season; spring flowers, summer, fall. Vines, tall flowers. Native plants. Beds. Porch boxes, baskets. Soil. Pruning, care.

Illustrative material, demonstrations.

Catalogs. Pictures.

Related material.

Spacing, backgrounds, color combinations in flowers.

Subject matter.

Painting exterior of building.
(1 lesson.)

Painting, value of, kinds, costs, colors, trimmings. Location of outhouses, fewer but more convenient. Sanitation, upkeep of grounds, buildings. Lattices and blind fences.

Illustrative material, demonstrations.

Pictures of well kept homes, neat outhouses.

Related material.

Relation of house to grounds.

Subject matter.

Buying a home.
(1 lesson.)

Money to be spent. Size of house needed. Yard: drainage, trees, size. Location in relation to business. Improvements made, needed. Road or street: kind, condition, much traveled.

Furnace, running water, bathroom. Arrangement, size of room, storage places. Methods of financing a place.

Care of
Kitchen
equipment.

Subject matter.

Care of aluminum, glassware, tin, iron, nickel, copper, silver, stoves, refrigerator, etc. Cleaning agents. Prevention of abuse of equipment.

Illustrative material, demonstrations.

Cleaning agents. Show use. Putting wicks in stove.

Related material.

Cause of tarnishes. Removal.

Floors—
—walls. Rugs,
carpets.

Subject matter.

Sweeping, mopping. Care of waxed floors. Wiping down walls. Cleaning wall paper. Dusting. Sweeping rugs, carpets. Cleaning with salt, sawdust, etc. Seasonal cleaning. Vacuum cleaners.

Illustrative material, demonstrations.

Proper way of cleaning floors, walls, rugs, etc.

Linens.
Bedding. Cur-
tains.
(2 lessons.)

Subject matter.

Removing stains. Washing linens, quilts, blankets. Washing curtains, shaking, mending, laundering.

Illustrative material, demonstrations.

Mended lace, net curtains.

Household
pests.
(1 lesson.)

Subject matter.

Danger of household pests. Habits of common pests. Commonest causes of prevalence of most. Seasons for fighting pests. Habits of ants, flies. Disinfectants and traps.

Illustrative material, demonstrations.

Eradicators.

Home Practice Work

Rearranging furniture in any room for convenience, better artistic arrangement.
 Refinish furniture.
 Refinish walls, floors.
 Hang curtains, pictures.
 Care for any room.
 Care for silver, glassware, linen.
 Launder quilts, blankets.
 Make house or yard more sanitary.
 Plan flowers for house or yard.

Study and Report Problems

Make plans for simple improvements costing \$25, \$50, \$100.
 Plan better storage space in house.
 Draw plan for more convenient kitchen.
 Plan improvement of grounds.
 Collect practical house cleaning helps.

Knowledge and Skill to be Gained

Make a home more attractive by using to better advantage what is already there.
 Use paints, varnishes, stains to refinish furniture, walls, floor.
 Plan additional storage space, additional room or porches.
 Care for the house in the simplest most convenient way.

CHILD WELFARE

Second Year—Three Weeks

Aim.

To give the girl some basic points on the care and rearing of children.

Subject matter.

Infant feeding.
(3 lessons.)

Nature's feeding: digestive process, mother's milk. Care of mother's health. Regularity of feeding. Technique of nursing. Artificial feeding, supplementary feeding. Care and selection of milk, pasteurization, sterilization. Care after preparation. Care of bottle, nipple. Preparation of bottle. Technique of bottle nursing. Common mistakes in infant feeding. Comparison of mother's milk with cow's, goat's. Proprietary foods. Advantages and disadvantages. Irregularity in feeding, over and under feeding. Composition of food. Milk not properly prepared. Addition of other food: water, fruit, tomato juices, beef juice, broth, barley water, crisp toast, addition of vegetables. Age of weaning, method of weaning.

Illustrative material, demonstrations.

Pasteurize, sterilize milk. Prepare bottle. Modify milk. Types of bottles. Milk sugar. Proprietary foods.

Related material.

Review value of different food principles in diet. Digestion.

Subject matter.

Environment.
(1 lesson.)

Light, heat, ventilation of rooms. Furnishings (bed, crib, other equipment). Baby sleep alone. Use of pillow. Care of room. Clean infant's room.

Illustrative material, demonstrations.

Make posters of well arranged room to use for baby.

Subject matter.

(2 lessons.)
Clothing.

Materials suitable for each garment. Style of garments. Care of clothes. Laundering baby's clothes, starching, stretching hose, shirts.

Illustrative material, demonstrations.
 Pictures. Finished garments. Materials.

Subject matter.

Physical
 development.
 (1 lesson.)

Relation of weight to age and health. Regular gain, increase in height, weight. Development of muscular action, senses, speech. Teeth.

Illustrative material, demonstrations.
 Weight and height chart for baby.

Subject matter.

Physical
 care.
 (1 lesson.)

Necessity of bathing. Temperatures of water, room. Method of bathing. Toilet articles—soaps, powders. Exercise, outdoor life. Sleep—regularity, amount, time. Handling, lifting. Training for regular habits (feeding, sleep, bowel movement). Habits to avoid (crying, sucking fingers, bed wetting, etc.)

Illustrative material, demonstrations.

Give baby a bath. Make posters. Contrasting good and bad conditions for baby.

Subject matter.

Common
 ailments. Con-
 tagious dis-
 eases.
 (3 lessons.)

Symptoms, cause, treatment of common ailments: convulsions, colic, cramp, earache, foreign bodies in eye, ear, nose, throat, stomach, constipation, diarrhea, adenoids, croup. Symptoms, cause, treatment, spreading, after effects in measles, mumps, whooping cough, scarlet fever, chicken pox, diphtheria, tuberculosis.

Illustrative material, demonstrations.

Talk by nurse or doctor.

Subject matter.

Food for
 older children.
 (2 lessons.)

Meals for different ages. Proportions of various nutrients, minerals, vitamins. Preparation of food. Method, time and temperature of cooking. Variation of recipes and foods. Ways of using milk. Teaching child to feed itself. Preparation of one day's diet for pre-school age children.

Illustrative material, demonstrations.

Posters, pictures, trays.

Amuse-
ments for in-
fants.
(1 lesson.)

Subject matter.
Kinds of toys. Sanitation of toys. Time to
amuse babies. Harm of playing with babies.
Kissing and fondling.
Illustrative material, demonstrations.
Good and bad toys.

Discipline
and education.
(1 lesson.)

Subject matter.
Good and bad habits, obedience. Punishments
need, kind, degree, time. Treatment of child as
a human being. Living habits child is expected
to acquire: truthfulness, honesty, promptness,
etc. Answer questions of child truthfully. In-
structive games and stories. Social etiquette.
Illustrative material, demonstrations.
Articles in woman's magazines.

Home Practice Work

Bathe and dress small child.
Prepare baby's bottle.
Prepare such foods as fruit
juice, prunes, gruels, etc.
Weight and height chart for
baby.
Put baby to bed daily for two
weeks.
Make suitable clothing for
child.
Make toys for children—
cloth dolls, animals, bean
bags, etc.
Tell good story to child or
children.
Teach three good games to
small children.
Care for child one hour each
day for three weeks.

Study and Report Problems

Children's digestive disor-
ders.
Charts of proper and improv-
er foods for children of va-
rious ages.
Chart of normal development
of child.
List of good stories for chil-
dren between 2-4, 4-7, 7-12
years of age.
List of games for small chil-
dren.
Alabama Child Labor Laws.

Knowledge and Skill to be Gained

Simple principles of infant feeding.
Physical development and care of children.
Discipline of children. Good habits.
Common ailments, simple remedies.
Amusements—toys, games, stories for various ages.

HOME MANAGEMENT

Second Year—Three Weeks

Aim.

Saving of time, energy and money in the management of a home.

Saving Steps

Subject matter.

Arrange-
ment of fur-
niture.
(3 lessons.)

Saving steps, time, energy. Work areas in kitchen. Saving steps: kitchen furniture in relation to dining room, dresser near clothes closet, sewing table near machine, etc. Study arrangement of furniture in school laboratories.

Illustrative material, demonstrations.

Illustrations of rearranged kitchen. Diagram of inconveniently arranged kitchen. Show steps taken in preparing a meal.

Related material.

Good lighting, ventilation.

Subject matter.

Labor sav-
ing devices.
(2 lessons.)

Labor saving devices: fireless cooker, iceless refrigerator, cold box, pressure cooker, work stool, work table on castors, scrubbing chariot, shoe blacking box, washing machine, serving wagon, electrical appliances, dish drainer, water in house, sinks. Consider cost, time used, upkeep.

Illustrative material, demonstrations.

Pictures. Home-made conveniences.

Subject matter.

System in
home.

Daily, week-
ly, seasonal
schedules.
(3 lessons.)

Schedules: use, value. Points in making, work to be done, number to do work. Daily tasks: meals, dishes, make beds, etc. Weekly tasks: laundry work, sunning beds, cleaning pans, marketing, etc. Seasonal tasks: storing clothes, sewing, washing curtains, shopping for clothes, canning food. Value of having a place for things.

Illustrative material, demonstrations.

Lists of work to be done. Schedules permitting school girls to help at home.

Subject matter.

Finances. Family budget. (3 lessons.)
 Meaning of budget. Income—amount, sources. Expenses. Division of income, points governing division. Make budget for family with income and problems similar to those in neighborhood.

Illustrative material, demonstrations.

Tables showing expenditures. Tentative budget of other families.

Subject matter.

Account keeping. (2 lessons.)
 Reasons for keeping accounts. Simple method of keeping accounts. Keeping accounts of bills, filing bills, receipts. Credit, cash, installment plan of buying. Making out mail orders, money orders, registry, postal insurance.

Illustrative material, demonstrations.

Forms for family accounts.

Subject matter.

Banking. Savings. (1 lesson.)
 Banking: value of bank account, kinds, opening an account, checks, drafts, traveler's, cashier's check, receipts, safety deposit boxes. Savings: interest paid, bank, bonds, certificates, etc. Insurance.

Illustrative material, demonstrations.

Visit to bank if possible. Various forms used in banking.

Related material.

Savings through care of health, clothes, food.

Subject matter.

Higher life. (1 lesson.)
 Self improvement. Magazines. Recreation. Home entertainment. Church activities. Civic activities. Education. Travel.

Illustrative material, demonstrations.

Good magazines. Stories to be read aloud. Games.

Home Practice Work

Make tentative family budget.
 Keep famil accounts for one month.
 Follow schedule for a week.
 Arrange furniture in one room to save steps.
 Make one labor saving device.

Study and Report Problems

Make schedules: daily, weekly or seasonal.
 Work out system of keeping family accounts.
 Ways of saving money.
 Select good magazines.
 Plan games suitable for children at home.
 Plan simple entertainment for family.

Knowledge and Skill to be Gained

Plan usable work schedules.
 Arrange equipment conveniently.
 Make tentative budget for family in community.
 Handle ordinary family and personal finances.

| The Result—the Girl, measured by..... | | 25 |
| a. Increased interest and improvement in work..... | 5 | |
| b. Taking entire care of her room at home..... | 5 | |
| c. Doing all her mending and assisting with fam- ily mending | 5 | |
| d. Making her own underclothes. preparing and serving simple home meals at the end of the first year | 5 | |
| e. Taking an assistant's place in the activities of the home | 5 | |

REQUIREMENTS FOR STATE AID IN VOCATIONAL HOME-MAKING IN ALL-DAY SCHOOLS

One-half of the school day shall be given to home economics subjects or home economics and related subjects. If the school day is six hours, this means 180 minutes a day or 900 minutes a week. This may be used in five 120-minute periods for home economics and seven 45-minute periods, or five 60-minute periods for related science or arts, four of which are laboratory periods.

The related subjects shall be art or science related to the home. Art courses meeting this requirement are applied art and costume design. Science courses are general science, health course for girls, hygiene, sanitation, applied biology, household physics, household chemistry. These classes must be segregated, having in them only vocational home economics pupils.

The girls shall be at least **fourteen** years of age.

The courses shall be offered in the first two years of high school if only two years work is offered, except by special arrangement.

Rooms.

Two rooms of suitable size shall be set aside for cooking and sewing. Both rooms shall be well lighted and ventilated. The cooking laboratory is to be screened and have a separate chimney for range.

Equipment.

Five hundred dollars shall be made available the first year for equipment. (Credit towards this amount will be allowed for approved equipment on hand. Tables, chairs, cupboards, bookcases are not equipment.) Seventy-five dollars shall be available each succeeding year to be expended if necessary,—this fund to be expended as directed by the State Department for equipment for teaching cooking, sewing, laundering, serving, housewifery and home nursing and for purchasing reference books. The first year, \$25 of this fund will be used for reference books and additional books purchased each year as advised by this Department:

Class.

Size. No class is to exceed 16. The minimum number in one class is to be 8. If two classes are desired, at least 20 girls in a school must take such a course for it to be introduced.

Maintenance.

Five dollars for each pupil a year is to be allowed by the school. No fee is to be charged any pupil. The minimum maintenance fund a year is \$100, maximum (32 pupils) \$160. The travel of the teacher to one conference, called by the State Superintendent is to be paid by the school from the maintenance fund. Any maintenance fund not spent becomes additional equipment fund for the following year.

Text Books.

Text books will be used in all classes as instructed for vocational home economics courses.

Teacher.

Two years training above high school specializing in home economics, with successful teaching experience is required. Three years without teaching experience up to and including the year beginning September, 1922, is required. Four years without teaching experience beginning September, 1923, is required. All applicants are to be passed upon by the State Department in regard to the necessary qualifications before any position is offered to any teacher or any contract is entered into.

Time.

Nine months minimum.

Salary.

Three-fourths of a minimum salary of \$1,000 and a maximum salary of \$1,200 will be reimbursed from State and Federal funds. Additional salary may be paid by any local board. Summer school must be attended three summers out of five if the teacher is not a college graduate in home economics, the first two summers to be in succession. One summer must be attended by college graduates entering the work.

Contract.

The contract must be signed and approved by this Department before school opens.

Changes in Requirements.

The State Board reserves the right to make changes in any of the above requirements at the beginning of any school year.
